Since 1899, AM Best's mission has been to provide accurate, timely and comprehensive information to anyone interested in the creditworthiness of insurance companies and insurance-linked securities. Our vision is to be the world's most recognized, accepted and respected full service credit rating agency, news publisher and data analytics provider specializing in the insurance industry.

A Best's National Scale Rating is a relative measure of creditworthiness in a specific local jurisdiction that is issued on a long-term basis and derived exclusively by mapping the NSR from a corresponding global Issuer Credit Rating (ICR) using a transition chart. An NSR is only comparable to other NSRs within the same country, as denoted by the specific country code suffix attached to each NSR, and not across countries. In cases where one global ICR level maps to more than one NSR level, a rating committee will determine which level, in accordance with the mapping, is appropriate given the relative financial strength of the entity to meet senior financial obligations.
